

# Receive a \$300 rebate

on an ENERGY STAR® qualified, high-efficiency natural gas furnace or boiler.

Receive a \$50 rebate on a residential ENERGY STAR qualified, natural gas water heater.

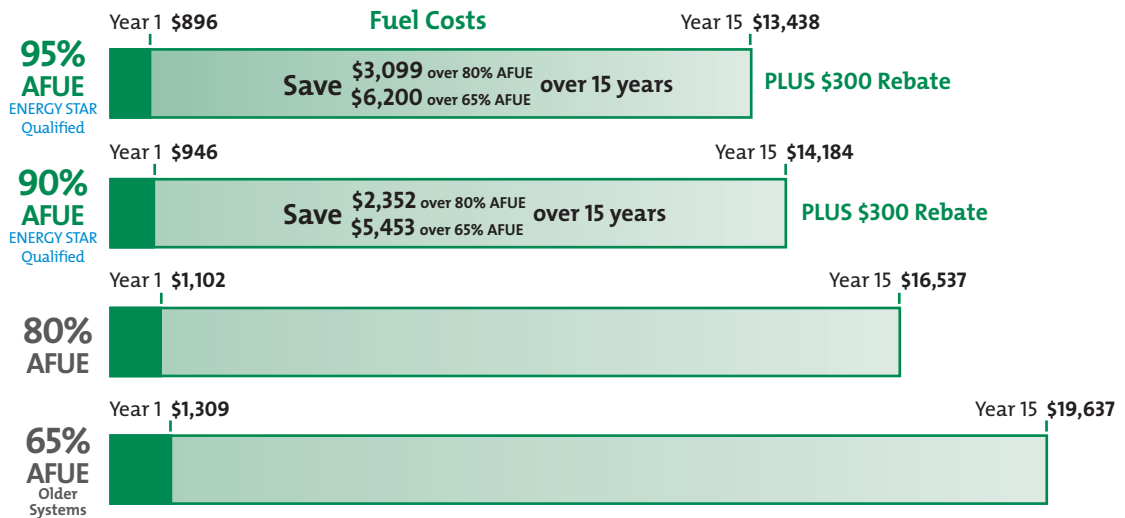

## Partnering with you to save – The PECO Natural Gas Energy Efficiency Rebate Program

Using energy more efficiently reduces your monthly energy bills and your carbon footprint – all without sacrificing comfort. PECO’s new Natural Gas Energy Efficiency Rebate Program helps you save even more.

To be eligible for the rebates, replace your current natural gas heating system or water heater – or convert from another fuel source – and install ENERGY STAR qualified, natural gas equipment between January 1, 2009 and December 31, 2009. See program details on back.

## High-efficiency heating saves you money for years to come

Heating system efficiency ratings are expressed in Annual Fuel Utilization Efficiency (AFUE). The higher the AFUE, the more efficient the system and the less you’ll spend on energy to achieve the same comfort.

Heating fuel costs/savings estimates based using the following assumptions: 1) energy usage of 200 ccf per month, four heating months over 15 years (average life of heater) and 2) PECO natural gas rates as of January 1, 2009.

## Amount of your energy dollar actually used for heating

High-efficiency heating gives you more warmth from every energy dollar.

# PECO Natural Gas Energy Efficiency Rebate Program

## Frequently Asked Questions

### Q: Who is eligible for the PECO Natural Gas Energy Efficiency Rebate Program?

**A:** PECO natural gas customers can take advantage of rebates for installing qualified natural gas equipment. Note: Residences and businesses within Philadelphia County receive their natural gas service from PGW and therefore are not eligible for PECO natural gas rebates.

### Q: What type of equipment is eligible for the rebate program?

**A: High-efficiency natural gas furnace or boiler.** Replace your current natural gas heating system – or convert from another fuel source – and install an ENERGY STAR® qualified, high-efficiency natural gas furnace that has a 90% Annual Fuel Utilization Efficiency (AFUE) rating or greater, or a high-efficiency natural gas boiler that has an 85% AFUE rating or greater.

**Residential high-efficiency natural gas water heater.** Replace your natural gas water heater with, or convert to, a residential ENERGY STAR qualified, high-efficiency natural gas water heater that has an Energy Factor (EF) of 0.62 or greater.

## Replacement or Conversion Equipment Qualifications

Program Name	Equipment Qualifications
Residential Natural Gas Furnace \$300 Rebate	ENERGY STAR qualified, high-efficiency, 90% AFUE* rating or greater
Residential Natural Gas Boiler \$300 Rebate	ENERGY STAR qualified, high-efficiency, 85% AFUE rating or greater
Residential Natural Gas Water Heater \$50 Rebate	ENERGY STAR qualified, high-efficiency, 0.62 EF** rating or greater
Business Natural Gas Furnace \$300 Rebate	ENERGY STAR qualified, high-efficiency, 90% AFUE rating or greater
Business Natural Gas Boiler \$300 Rebate	ENERGY STAR qualified, high-efficiency, 85% AFUE rating or greater

\* AFUE – Annual Fuel Utilization Efficiency \*\* EF – Energy Factor

### Q: How much can I save with a high-efficiency furnace or boiler?

**A:** Estimate your potential savings with PECO’s online Natural Gas Heating System Efficiency Calculator. Simply input basic data about your energy usage to compare the cost of heating with four different AFUEs: 65%, 80%, 90% and 95%. Visit [www.peco.com/save](http://www.peco.com/save).

### Q: How long is the rebate program in effect?

**A:** You must purchase and install qualifying equipment between January 1, 2009 and December 31, 2009, to be eligible.

### Q: How do I qualify and where can I get more information about the program?

**A:** Ask your heating contractor how to qualify, visit [www.peco.com/gasrebates](http://www.peco.com/gasrebates) or call 1-866-849-9763. Additional equipment qualification information can be found at [www.energystar.gov](http://www.energystar.gov) and [www.gamapower.org](http://www.gamapower.org).
