GAS RATES TO CHANGE BEGINNING MARCH 1, 2023

Beginning with service provided March 1, 2023, changes will affect your monthly gas bill. For a residential customer using 80 Ccf (one Ccf equals hundred cubic feet) of gas per month, the effect of these approved changes is a total decrease of \$9.87 to the typical monthly bill, from \$120.65 to \$110.78, or 8.18%. For a commercial customer (Rate GC – General Service – Commercial and Industrial) using 400 Ccf per month, the bill will decrease by \$48.42, from \$523.51 to \$475.09, or 9.25%. The enclosed bill reflects these changes. The details are explained below.

Purchased Gas Cost Rate (PGC): The PGC collects natural gas costs from customers and will decrease by 11.667 cents per Ccf of gas for residential customers and 11.620 cents per Ccf for commercial customers effective March 1, 2023. The decrease is the result of lower projected natural gas charges partially offset by the reconciliation of collections for previous natural gas purchases.

If you purchase the natural gas you use through PECO, the actual impact on your bill will depend on the amount of natural gas you use. If you purchase the natural gas you use from a competitive natural gas supplier, the price you pay will depend on the price and terms of your contract with your supplier.

These proposed natural gas prices are based on current wholesale market prices. PECO continuously monitors market prices and may adjust prices on a quarterly basis (March 1, June 1, September 1 and December 1).

Federal Tax Adjustment (FTA): The FTA refunds prior years tax savings and provides the associated reconciliation of any refunds or recoveries of tax savings. The FTA will decrease from a current charge of 0.94% to a value of 0.00% effective March 1, 2023.
