

LIHEAP is Open

LIHEAP cash grants up to \$1,000 available now.

Homeowners, renters, room renters and subsidized housing tenants may be eligible. As a result of the pandemic, LIHEAP helped more than 100k customers and provided more than \$45 million in assistance last year—more than in previous years. However, funding levels are lower this year and grants can take up to 45 days to process. Apply early!

- You don't need to be behind on your PECO bill to apply for LIHEAP assistance. The only requirement is income
- Nothing works without electricity, including your gas heater and cooking appliances. You can assign your LIHEAP grant to go toward your PECO bill
- If your income was impacted by the COVID-19 pandemic, you may now be eligible for LIHEAP, even if you have not been eligible before

The minimum LIHEAP Cash grant amount now ranges from \$300 to \$1,000 per customer. If you have questions or need help with the application process, call PECO's LIHEAP hotline, 1-800-34-HELP-4 (1-800-344-3574) or visit us at [PECO.com/LIHEAP](https://www.peco.com/LIHEAP)

Household Size	Annual Income Limit	Monthly Income Limit
1	\$20,385	\$1,699
2	\$27,465	\$2,289
3	\$34,545	\$2,879
4	\$41,625	\$3,469
For each additional person, add:	\$7,080	\$590

PECO Presents

Winter in Franklin Square

November 16, 2022 through February 26, 2023

Holiday magic and winter fun returns to Franklin Square November 16 through February 26 as one of Philly's favorite destinations transforms into a winter wonderland!

The **Electrical Spectacle Light Show** presented by **PECO** lights up Franklin Square all winter long with new songs and classic seasonal favorites as 200,000 shimmering lights illuminate the park.

Free light shows begin at 5 p.m. daily and run every 30 minutes until 9 p.m., weather permitting.

Chilly Mini Golf brings seasonal music, lights, and larger-than-life wintertime friends to Center City's only miniature golf course day and night! Take a spin on the **Parx Liberty Carousel** playing holiday music.

Warm up by outdoor fire pits and in the heated tent with hot beverages and delicious snacks.

Enhancing Reliability and Resiliency

Over the next five years, PECO is investing billions to modernize the electric grid and reduce the impact of extreme weather on electric infrastructure.

Strengthening our energy infrastructure to face intensifying weather patterns, while supporting more clean energy resources is a key element of **PECO's Path to Clean**, which includes a goal for PECO and the collective Exelon utilities to reduce operations-driven emissions by 50 percent by 2030 and achieve net-zero emissions by 2050. We're building on our commitment to protect and preserve the environment and combat climate change by playing a leading role in the Greater Philadelphia Region's transition to a clean energy future.

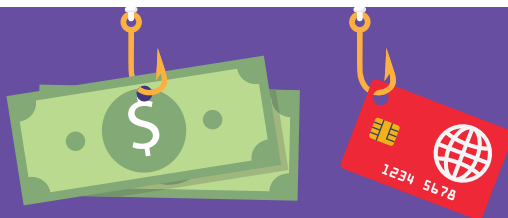

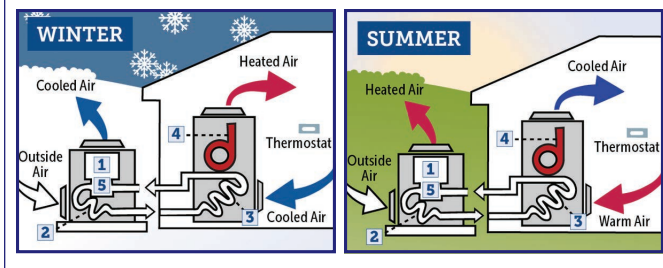

In addition to targeted reliability-focused infrastructure investments, PECO is committed to helping customers by providing a multitude of programs to manage their energy costs and save money. Visit peco.com/PathToClean

Get to know your heat pump—and how it works.

How does a heat pump work? Heat pumps work more efficiently than conventional heating systems. Heat pumps move air constantly, providing an even and constant air temperature in your home. On most winter days, when the temperature is above freezing, your thermostat can be set at 68 degrees.

What if it's below freezing? Heat pumps have built-in backup systems that are triggered when temperatures dip below freezing. However, backup systems can use a lot of electricity. It's best to keep thermostat set right around 68, then drop the setting a few degrees when the outside temperature dips below freezing.

Do not pay scammers

PECO will never call you for bill payment in cash, prepaid debit/credit card, gift card or cryptocurrency.

Help us #stopscams: peco.com/scams

On the cover: Hildacy Preserve, Media, PA—Named for Hilda and Cyril Fox (who lived here and raised race horses and German shepherds) these 55 acres are all that remains of a 300-acre land grant from William Penn to a local tanner and his family. Hilda Fox donated the tract to Natural Lands in 1981 with instructions to continue the Foxes' conservation work. Natural Lands has worked to restore the woodlands, meadows, and wetlands to a more natural state. PECO is proud to support these efforts through the PECO Green Region Open Space Program, which is administered by Natural Lands. To learn more, visit natlands.org/peco
