

FREE Energy Checkup FAQs

Free Virtual Energy Checkups & Free In-home Energy Checkups

Who is eligible for the LEEP program's FREE Energy Checkups?

You may qualify if you answer yes to these three questions:

1. Are you a PECO residential electric customer who personally receives an electric bill?
2. Is your monthly household income at or below the amount noted in the following chart? If you do not meet the household income requirement, check out our [Energy Assessment](#).

Number of People in Your Home	Maximum Monthly Household Income
1	\$1,610
2	\$2,178
3	\$2,745
4	\$3,312

**For each additional person living in your home, add \$567.*

3. Do you have permission to make energy-saving upgrades at your residence? (Renters may need to have landlord's permission to participate.)

To confirm eligibility, call 1-888-573-2672 between 7 a.m. and 7 p.m. Monday through Friday.

What's the difference between a Virtual Energy Checkup and an In-home Energy Checkup?

Both the virtual and in-home energy checkups are thorough assessments of your home's energy use by a certified energy advisor. With either approach, you'll receive a written report detailing ways you can save energy and appropriate energy-saving products (e.g., LED bulbs, low-flow shower heads, smart power strips, etc.) for free.

With the in-home approach, the energy advisor personally visits your home to find ways you can save energy. The virtual approach is very similar, but the energy advisor remains in his or her office and conducts the assessment remotely with your assistance. Using your video-enabled smart phone and WIFI network, together you'll find ways to save energy – and money – throughout your home.

Can I use my smart phone's data connection rather than a WIFI network for a Virtual Energy Checkup?

We strongly recommend using a WIFI network. Using a mobile device's data connection – rather than wifi – often causes technical difficulties with the video during a Virtual Energy Checkup.

How can I participate in a FREE Energy Checkup?

Call 1-888-573-2672 between 7 a.m. and 7 p.m. Monday through Friday.

When can I schedule a FREE Energy Checkup?

A FREE Energy Checkup – in-home or virtual - typically takes about one hour to complete. For customers with electric heat, the appointment typically takes between two and two-and-a-half hours. To schedule an appointment, call 1-888-573-2672 between 7 a.m. and 7 p.m. Monday through Friday.

Who will perform the FREE Energy Checkup?

PECO's partner CMC Energy Services performs all free energy checkups. To help you verify that the CMC employees are working with PECO, they will present a PECO photo ID badge before entering your home.

Who will perform the energy-saving upgrades for me?

All basic energy-saving products, such as light bulbs, will be installed by the advisor during your in-home energy checkup. If you opt for a Virtual Energy Checkup, the energy-saving products will be delivered to your home. "How-to" instructions will be included in your free energy kit. Plus, you can contact your energy advisor with questions about installation. If additional improvements to your home are approved, one or more of our participating contractors will contact you to schedule follow-up appointments.

How much will the additional improvements cost me?

All services are provided free of charge for income-qualified PECO customers.

How long do I have to decide about proceeding with the recommendations?

Our contractor partners will contact you directly, and work with you to find a schedule that meets your needs.

What are the qualifications of the energy advisors and participating contractors?

PECO energy advisors are experienced in residential energy conservation, construction and building diagnostics, and all our advisors are Building Performance Institute (BPI) certified professionals. Participating contractors are professional contractors licensed in Pennsylvania and have provided references, qualifications and evidence of insurance.

How long will PECO offer this program?

The program is currently available through May 31, 2026. However, funds are limited, and programs may be changed or terminated, so act today.

How do I determine if I am a PECO residential electric heat customer?

You are a PECO residential electric heat customer if you have an electric heat pump, electric furnace or electric baseboard as your main source of heat. As such, you may be eligible for FREE insulation and air sealing. Your PECO energy advisor will need to perform advanced diagnostic testing, including a blower door test and thermal imaging, to pinpoint air leaks and identify energy-saving opportunities
