

Reliability Station

Delaware County had a 3.5% growth in natural gas in the last year. The reliability station will enable PECO to distribute more natural gas into Delaware County through the 11.5 miles of new natural gas main. It will be the receiving point that will reinforce the supply of natural gas to Delaware County and will ensure PECO can continue to deliver safe and reliable natural gas to meet the growing needs of the customers and communities we serve.

Why was the Sproul Road location selected?

- ▶ **PROXIMITY:** The station must be in close proximity to Sproul and Lawrence Roads.
- ▶ **AVAILABILITY:** The owner was willing to sell.
- ▶ **SIZE:** The property must be between .5-1 acre.
- ▶ **ZONING:** The property must be zoned for utility use.

Is it safe to place a natural gas reliability station in this area?

Safety is always PECO's top priority. The reliability station is designed with the safety of our customers, communities, and employees as our top priority.

As with all PECO facilities and projects, we have multiple safety measures in place. This facility is monitored 24/7 to ensure safe operation, which allows us to shut the station down remotely at any time.

November 2020

PECO Natural Gas Reliability Project Update Marple Township

ABOUT THE PROJECT

In May 2020, PECO began a **Natural Gas Reliability Project** in Montgomery and Delaware counties to continue to meet the growing needs of our customers. As part of the 11.5 mile project, we are installing approximately two miles of new natural gas main in Marple Township and a natural gas reliability station on 2090 Sproul Road, as well as upgrading our natural gas plant in West Conshohocken.

Natural gas main work on Sproul Road in Marple Township will occur in phases, with work expected to be completed by May 2021. The anticipated start date of construction for the reliability station is April 2021.

ABOUT THE NOVEMBER PROJECT UPDATE

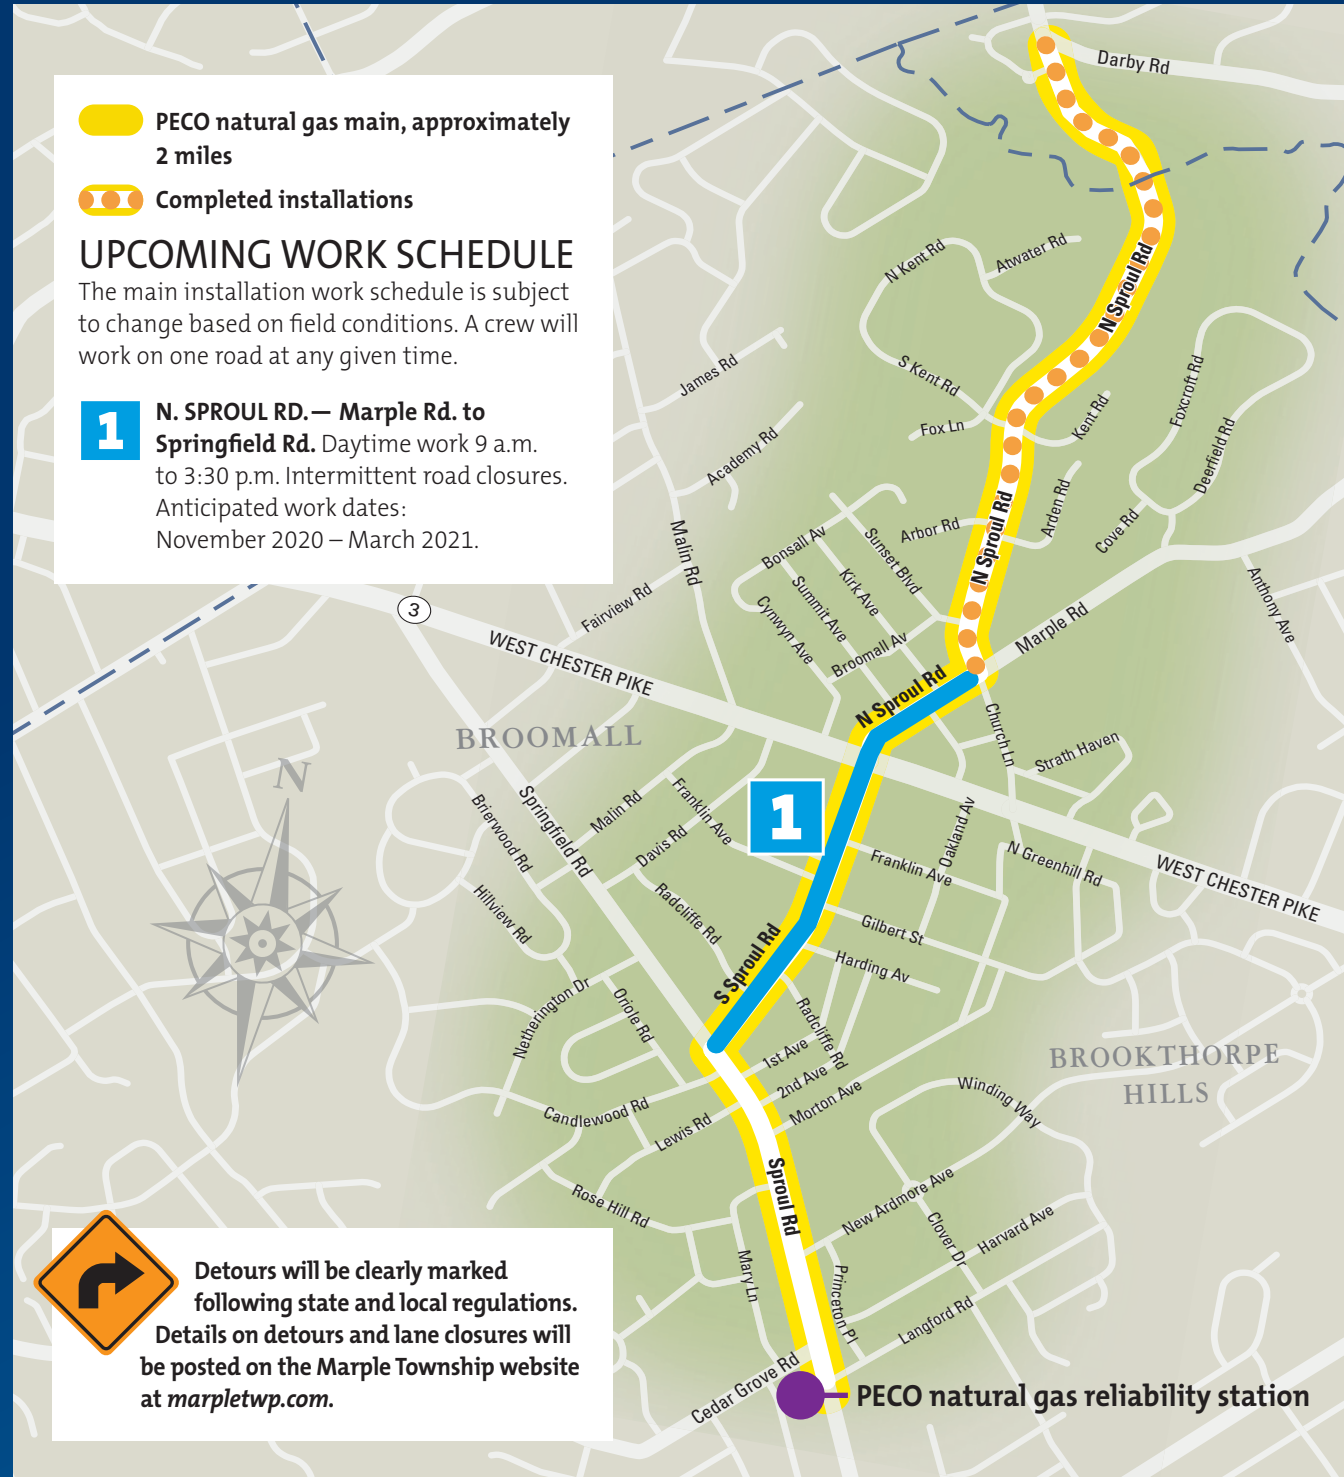

PECO is dedicated to keeping you informed about our work. As part of that commitment, this is the November 2020 issue of the *PECO Natural Gas Reliability Project Update*. In this issue, you will read about the progress of the project in your area, important traffic information, and helpful energy tips.

PROJECT UPDATE

- Communicated project plans to Township officials, residents, and PennDOT.
- Continuing to maintain work zones to comply with COVID-19 safety guidelines.
- Completed installation of natural gas main on North Sproul Road between Darby Road and 406 North Sproul Road.
- Completed installation of natural gas main on North Sproul Road between 406 North Sproul Road to Marple Road.
- Completed roadway restoration on North Sproul Road between Darby Road and 406 North Sproul Road.

WHO IS INVOLVED?

General Asphalt Paving, a **qualified PECO contractor**, will be performing the work on behalf of PECO. For this work, some roadways and sidewalks may require excavation, which our crews will perform as safely as possible with limited inconvenience to residents. We are working with local officials to minimize the impact on traffic and pedestrians whenever possible. Access for services such as trash removal and emergency vehicles will be maintained during construction.

FOR QUESTIONS ABOUT THIS PROJECT, please contact Ally Pyrih, PECO project customer liaison, at Alexandra.Pyrih@exeloncorp.com or **484-685-7499**.
