Improving the energy efficiency of your business not only reduces energy expenses – it can also result in significant tax savings!

Businesses can claim up to $500,000 in deductions for commercial equipment purchased in 2017 – and up to $1 million for equipment purchased in 2018.

Rather than claim savings over a multi-year depreciation period, the IRS allows businesses to apply the Section 179 deduction all at once. Review the updates you’ve made to your facility in 2017 to see if they qualify for Section 179 deductions.

Plan ahead for 2018. Maximize your savings on the purchase of energy-efficient equipment with valuable incentives from PECO AND qualified deductions on your 2018 tax filing.

Visit peco.com/biz to learn more about energy-efficiency solutions and incentives.

PECO recommends consulting a tax professional for detailed equipment depreciation and other tax deduction information.

Consider the tax and energy savings from upgrading to high-efficiency –

- Heating, ventilation and air conditioning equipment
- Compressed air systems
- Servers, computer room air handlers and other data center improvements
- Refrigeration and cooking equipment
Quick ways to save

Energy is a leading expense for businesses of all types and sizes. So energy efficiency can substantially reduce costs, while improving operations, increasing occupant comfort and freshening up the appearance of your spaces.

In just five simple steps, PECO can provide your business with customized energy-saving solutions.

2. Answer 5 simple questions about your business.
3. Enter your name and email address.
4. Select “View Report” to see your recommendations.
5. Check your email for a copy of the report.

Restoring power in Puerto Rico

PECO employees answer the call

PECO and its sister utilities shipped vehicles and equipment by barge to Puerto Rico in February, where they were met with lineworkers and support personnel to continue restoration efforts. With these additional crews, the total number of power restoration workers on the island will increase to more than 5,500.

The company and its employees, along with the Exelon Foundation, also have contributed more than $800,000 to disaster relief efforts, including aid to Puerto Rico.
