

An Exelon Company

MY GREEN POWER  
CONNECTION

A group of people's hands are raised in a high-five gesture against a bright, sunlit background. The scene is filled with warm, golden light, suggesting a happy and energetic atmosphere. The hands are stacked in the center, with fingers spread. The background is slightly blurred, showing what appears to be an outdoor setting with buildings in the distance.

# YOUR SOLAR OPTIONS CONTINUE TO GROW

When you're ready to learn more about the benefits of going solar, we will help you understand your options and what solar could mean for you. Our Solar Calculator is a great place to start.

## SOLAR CALCULATOR

Using your address and factors like your roof's pitch and shading, our Solar Calculator will evaluate your roof's solar potential and the amount of energy your rooftop system could produce. You can even experiment by choosing the percentage of your energy that you want to come from rooftop solar so you can compare different options.

### WHEN YOU USE THE SOLAR CALCULATOR

you'll receive easy-to-read reports based on the recommended or preferred system size, with estimated:

- Number of solar panels needed
- Upfront installation costs
- Available payback period (when logged into My Account)
- Environmental benefits

### RECOMMENDED!

**For personalized results, log in to My Account.**

The Solar Calculator will automatically populate your address and previous 12 months of usage information.

**Haven't enrolled in My Account?**

Sign up today at [PECO.com/MyAccount](https://www.pECO.com/MyAccount).

## SOLAR CALCULATOR FEATURES

**PROPERTY EVALUATION:** You will learn your roof's solar potential based on factors such as roof direction, pitch and obstructions.

**SYSTEM SIZE:** You can experiment by choosing the amount of energy you want your system to produce or the cost of the solar system you install, and see the resulting number of solar panels needed.

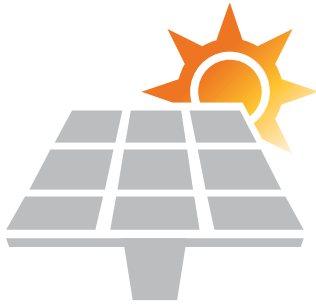

**COSTS AND BENEFITS:** You will learn about the estimated upfront costs as well as the estimated payback period.

**CALCULATE YOUR ENVIRONMENTAL BENEFITS:** You will see how much your rooftop system could reduce carbon emissions which means a cleaner planet for future generations.
