4,122	3,396	3,013	3,113	2,757	2,221	2,647

A Grade 1 Leak is a leak that represents an existing or probable hazard to persons or property, and requires immediate repair or continuous action until the conditions are no longer hazardous.

A Grade 2A Leak is defined as a leak that does not present an immediate hazard at the time of detection but must be repaired in 14 days or less based on the judgment of qualified personnel.

A Grade 2B Leak is defined as a leak that is recognized as being non-hazardous at the time of detection, but justifies scheduled repair based on probable future hazard.

**Number of Incoming Leak Tickets**
